## Tutorial Dialogue

- *Upon Start-Up:*
  - ??? (T. O. Borre) (Happy)
    - Eureka! We’re online! Welcome to your first day on the streets, Turbo! Let’s get introductions out of the way, I’m the man who invented you:
  - T. O. Borre (Prideful)
    - Thomas Oliver Borre! Super Floating University’s finest scientific mastermind!

- T. O. Borre (Excited)
    - Let's get right to it, shall we? We need to run just a few diagnostics before we can make our first delivery!
- *1st Tutorial: Driving*
  - T. O. Borre (Neutral)
    - *With Controller being used*
      - Let's start with Driving! Hold down the Right Trigger to start accelerating in the direction you're facing! You can turn around by rotating the Left Joystick!
    - *With Keyboard being used*
      - Let's start with Driving! Hold down the W key to start accelerating in the direction you're facing! You can turn around by using the A, S, and D keys!
  - T. O. Borre (Happy)
    - Once you feel comfortable with driving, head out that door and I can show you some of your more unique features!
- *2nd Tutorial: Boosting*
  - T. O. Borre (Excited)
    - *With Controller being used*
      - This next trick is my FAVORITE! If you press the Left Trigger, you'll activate your Rocket Thrusters! These will make you go unbelievably fast!
    - *With Keyboard being used*
      - This next trick is my FAVORITE! If you hold down Right Click, you'll activate your Rocket Thrusters! These will make you go unbelievably fast!
  - T. O. Borre (Upset)
    - BUT! Once you use it, you'll need to wait for it to recharge. Science is powerful, but not infinite-rocket-thrusters-powerful...
- *4th Tutorial: Drifting*
  - T. O. Borre (Surprised)
    - *With Controller being used*
      - Ahem— let me introduce you to Drifting! If you hold down the X Button/Shift Key, you can take sharp turns much, MUCH easier!
    - *With Keyboard being used*
      - Ahem-- let me introduce you to Drifting! If you hold down the Shift Key, you can take sharp turns much, MUCH easier!
  - T. O. Borre (Thinking)
    - Drifting makes curves much less intimidating, and safety is the utmost priority, Turbo! Well... after speed.
- *5th Tutorial: Breakables*
  - T. O. Borre (Prideful)
    - I forgot to tell you about your greatest feature! You have the power TO DESTROY!!! Only works on wooden boxes and pallets though...

- T. O. Borre (Excited)
  - Since you're a robot, running into those crates won't hurt you one bit! The shrapnel might get in the way a little bit, but it's better than getting stuck on a box!!
- *6th Tutorial: Bounce Pad*
  - T. O. Borre (Prideful)
    - Let me introduce you to the Bounce Pad!
  - T. O. Borre (Excited)
    - They're one of my earliest inventions, and they'll launch you up in the air in whatever direction you were originally going!
- *7th Tutorial: Buttons*
  - T. O. Borre (Neutral)
    - There's a Button! Whenever you drive into it, it'll activate something! For instance, this Button will open the gate to let you keep moving forward!
- *8th Tutorial: Catapults*
  - T. O. Borre (Excited)
    - The Catapult will send you flying through the air, much like the Bounce Pad! But! Every time you use a Catapult, it'll be sending you to the same spot!
  - T. O. Borre (Thinking)
    - As long as there's no outside influence at least...
  - T. O. Borre (Prideful)
    - And lucky for you Turbo, I added arrows pointing out from each Catapult, giving you an idea of where you'll go! No need to hold your applause!
- *8th Tutorial: Boost Pads*
  - T. O. Borre (Excited)
    - This is the Boost Pad, one of my favorites! If you drive over it, it'll give you a massive influx of SPEED in the direction it's facing!
